

## **Gate Opening Indicators**

**There is an indicator placed directly below the inspection door on the front of the Kleener.**

**The indicator tells how far the Screening gates are open.**

**When the pin is on:**

- 0 – The gate(s) are completely Closed**
- 1 – The gate(s) are open 1.5 inch**
- 2 – The gate(s) are open 2.5 inch**
- 3 – The gate(s) are completely open**

**The indicator is for reference only; the pin does not need to be directly on a certain number, but can be placed anywhere. When trying to determine the best opening for your set up; it is best to move the gates in small intervals and not from number to number (1 to 2 or 2 to 3).**

**Please reference page 12 for setting recommendations.**
